## **DETAILED ACTION**

### ***Priority***

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 09/736,368, filed on 12/15/2000.

### ***Specification***

2. The disclosure is objected to because of the following informalities: On page 1, section 0004, "flush" should be --flash--. Appropriate correction is required.
3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### ***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 recites the limitation "said small-sized storage medium" in lines 4-5. There is insufficient antecedent basis for this limitation in the claim.

### ***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2653

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

- Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamamori (US 5,003,530).

➤ Regarding claim 1, Yamamori shows a media cartridge [141] formed to have the same shape as that of a disk storage medium mounted on a disk drive for accessing said disk storage medium, and comprising not less than one attachment unit [143] for holding a small-sized storage medium [126] so as to be accessible by access means provided at said disk drive [Figs. 1 and 10].

➤ Regarding claim 4, Yamamori shows a plurality of attachment units [143] which are provided within a disk surface and on which said small-sized storage medium [126] is to be mounted, each said attachment unit [143] being located at an equal position from the center of said cartridge [Fig. 10].

*Allowable Subject Matter*

6. Claims 2, 3 and 5-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2653
